Important Announcement:

Update of DDOOCP

This is to inform all the NCC students who have referral or not completed DDOOCP of L4DC that, as part of regular and ongoing product review process, the teaching and learning materials for the Designing and Developing Object-Oriented Computer Programs (DDOOCP) unit of the L4DC have been updated by NCC. The teaching materials now utilise the C# programming language rather than Java.

All resit candidates can do DDOOCP assignment using Java in December 2017 assessment but after that NCC will not accept DDOOCP assignment using Java anymore.
